

Owen Hankinson

I am a freshman in college at The Masters University, studying computer science with an emphasis in artificial intelligence. I have such a passion for the world of technology where nothing excites me more.

I always have a desire to learn. It is something that not only excites me, but pushes me to challenge myself to learn more and more. With learning comes failure, through my failures I learn and I grow in knowledge.

EDUCATION

Westfield High School — *Academic Honors Diploma*

2016 - 2020

The Master's University — *Computer Science Major: Artificial Intelligence*

2020 - Present

Eleven Fifty Academy — *Winter Coding Experience*

Nov 2020 - Jan 2021

On my winter break, I took the opportunity to learn more and to grow more in my knowledge of software development. In this five week course I learned the ins and outs of HTML, CSS, and JavaScript and how they work together, as well as hands on experience working with API's extensively.

EXPERIENCE

Westfield Tech Solutions, — *Device Repair*

January 2018 - Present

I started my own company, fixing phones and devices locally for a cheap price. I learned a ton about business and marketing, and also made a lot of really strong connections along the way.

SKILLS

Adobe Suite

MacOS/Windows

Technology

Repair

Python

HTML

CSS

JavaScript

Node.js

REST API

ACHIEVEMENTS

Academic Honors
Diploma

Green Badge
Certification (Jan
2021)

Secured Tech Solutions, — *Apple Hardware Technician*

November 2019 - Present

My current job. Every day I go into work, and repair whatever is on for that day's schedule. That includes iPads, iPhones, Chromebooks, MacBooks and other laptops. The job is a fantastic experience for the future, and also very enjoyable.

Through this job I have learned intense attention to detail and opportunity for responsibilities that have real consequences.

Final Web, — *Web Designer*

August 2020 - Present

At Final Web I was an entry web developer whose main responsibilities are to provide maintenance on websites made through Final Web and to provide support to customers who needed it. I also had an opportunity to hone in my video skills by making some tutorial videos online for customers to watch and learn themselves.
